

GoalTrak® Introduces Personal Goal Setting Process for Reaching Smart Goals Fast

Quantum Voyage, Inc. at www.goalsettingforyou.com provides simple and affordable SaaS for individuals based on nine-step, time-proven process

Aurora, IL – April 20, 2010 – Today, Quantum Voyage, Inc. introduced **GoalTrak® PV**, a personal goal setting process for reaching smart goals fast at www.goalsettingforyou.com. This simple and affordable software as a service (SaaS) offers a time-tested, nine-step process subscribers can access anytime, anywhere with an Internet connection.

GoalTrak PV was created by organizational development expert and goal setting guru, Richard S. Lewine. Subscribers simply log onto the SaaS system, learn the art of goal setting from the extensive, help system and apply it to their specific goals.

“I absolutely love this program,” says customer Ted Rovet, owner of Authentic Contrarian Advisors, LLC. “I am on it for hours everyday, weekends and holidays included. I've done a lot of research, and used many different goal programs, some free and some more expensive, and nothing even comes close to this. For anyone like me who is really serious about their goals, this is really the only program available! I will recommend it to everyone I think is serious!”

Stop feeling frustrated about setting goals and make dreams a reality.

GoalTrak PV enables subscribers to:

- Define clear, smart goals, action-plans and timelines for success;
- Overcome obstacles and track progress;
- Access the SaaS anytime, anywhere with an Internet connection;
- Stay focused and save money; and
- Achieve goals as quickly as possible!

“Instead of being in the same place next year at this time, you can start your personal goal setting process right now, and be one step closer to making your dreams a reality,” states Richard S. Lewine, Quantum Voyage, Inc. President. “This SaaS, performance management system is based on over 30 years of extensive research and a time-proven, nine-step process (see <http://bit.ly/setsmartgoals>) that enables individuals to reach smart goals quickly and easily for as little as \$1.00 per week.”
